Continuation of 1(c) Other: the amendment proposed to the specification is not relative to the last entered amendment (i.e., the prior version). The amendment after final of 24 March 2006 was not entered yet the 6 April 2006 amendment is presented as if it had been entered. This is improper. Amendments must be presented with respect to the last entered amendment.

Continuation of 4(e) Other: All claims being currently amended must be presented with markings to indicate the changes that have been made relative to the immediate prior version. The claims (e.g., claim 1) have been presented with respect to the unentered amendment of 6 March 2006. This is not proper. The amendments must be resubmitted with respect to the last enetered version. Additionally, an amendment is present for claim 1 but the claim is presented with the status identifier "previously presented". This is improper.
